Remarks.

Being located in one of the largest fruit-producing districts in California, we are afforded most excellent opportunities for selecting those varieties that experience has proven to be most profitable for general cultivation—having regard to the quantity and quality of fruit produced.

Although our aim has been to render our list of varieties as small as possible, yet the various tastes of cultivators have required us to enlarge it much more than would be necessary for the selection of a good assortment ripening successively.

All market varieties are largely propagated, especially Pears and Plums. The destructive work of the curculio on the Plum, and all the diseases the Pear-tree is subjected to, at the East, causes the scarcity of such fruits in the Eastern market.

The main supply of such fruits will have to come from California, and as soon as more railroad communication is afforded us, and transportation cheapened, the shipping of fruits East will be the most remunerative business in California.

Packing is done in the best manner for distant places. We have shipped to Japan, China, Mexico, and South America, with success, plants arriving in excellent order. A charge is made for packing.

Trees are often exposed for days to sun and wind, at depots and wharves, and therefore is it better to pay for careful packing than that the Trees should not arrive in good condition.

Our terms invariably cash. The cost of labor, the care of Trees and Plants from two to five years, before they are saleable, and the absolute necessity of cash with which to carry on the business is our only apology for our terms.

Advice to Correspondents.

Correspondents will greatly oblige by observing the following:

All orders should be made out in a list by themselves, not mixed up with the body of the letter.

Persons not acquainted with the different varieties of Fruit will do well to leave the selection to ourselves, as we shall send only such as give general satisfaction.

All orders from unknown correspondents must be accompanied with remittance or satisfactory reference.

All Trees are carefully labelled and packed in the best manner for shipping, according to distance, for which a charge will be made only to cover first cost of material and labor.

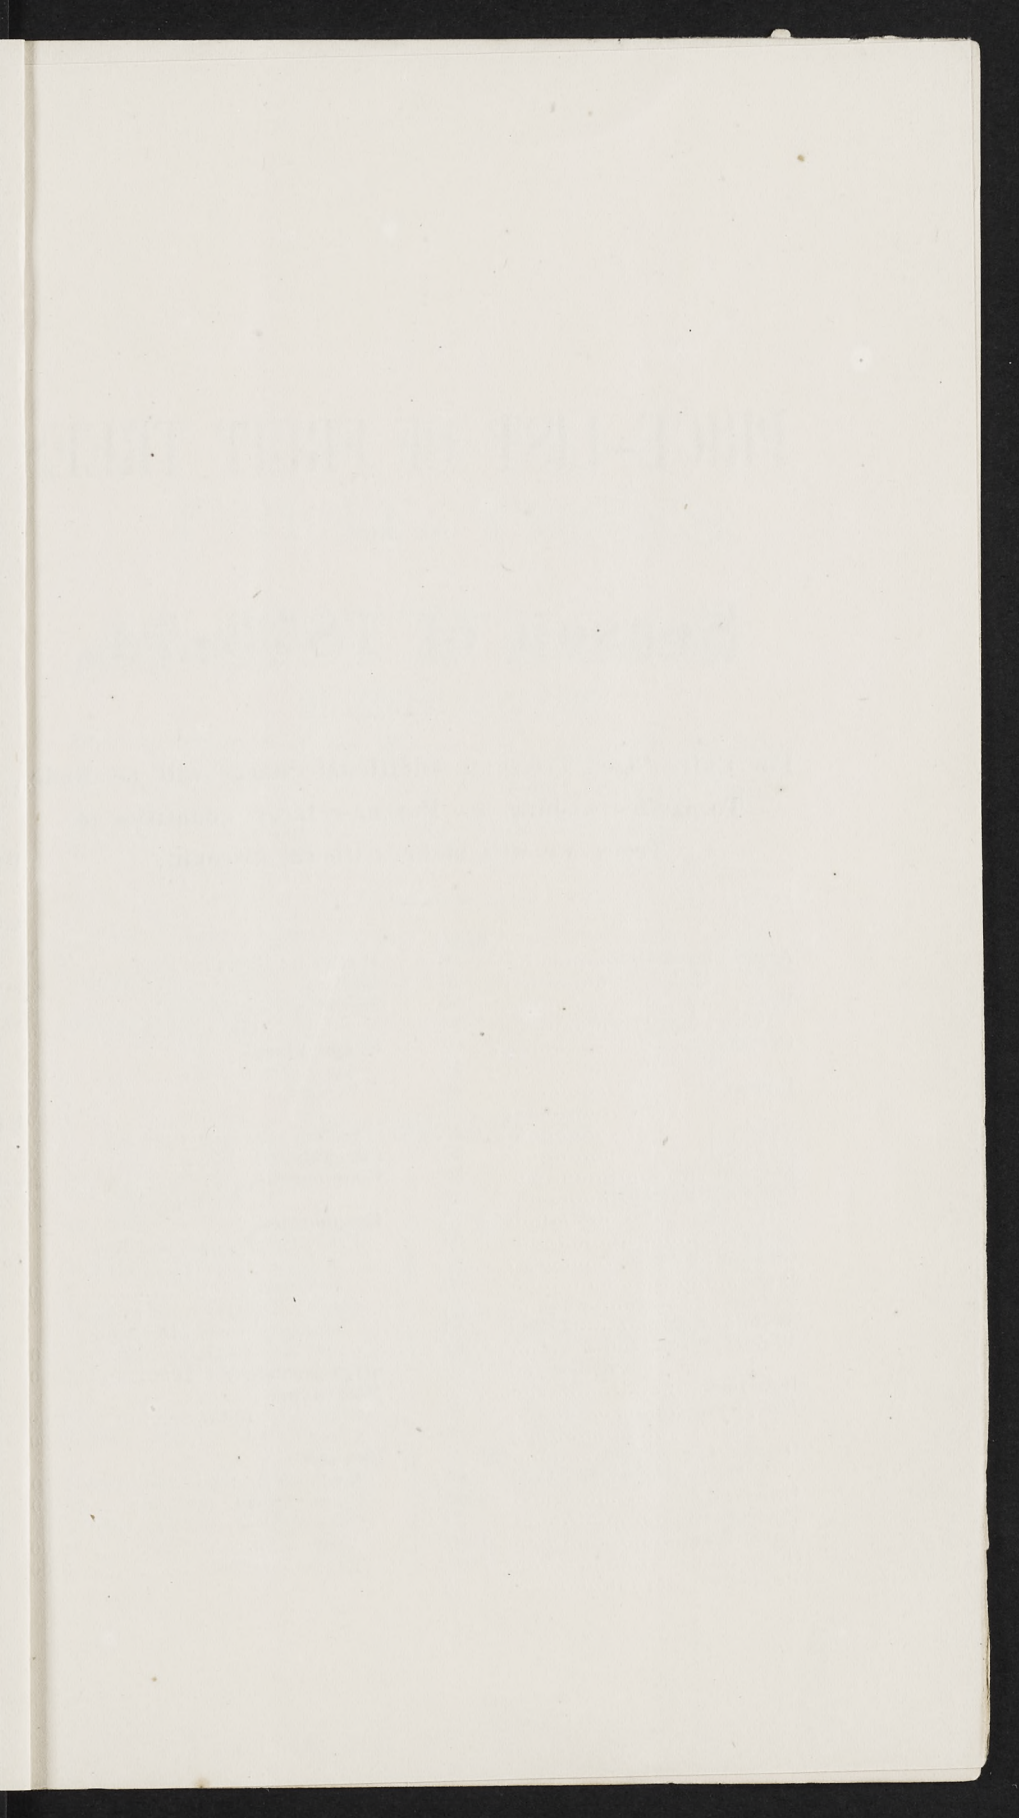

All articles will be delivered to the railroad depot without charge.

Any errors of ours in filling orders will be cheerfully rectified on our receiving notice.

Letters requiring information promptly answered. Address by mail or express.

JOHN ROCK,

Nurseryman, San Jose, Cal.

FRUIT TREES.

SUMMER APPLES.

- American Summer Pearmain**—Medium size, striped, tender and rich, early bearer. August.....
- Early Harvest**—Medium size, greenish yellow, mild, fine flavor, valuable for cooking. July.....
- Early Strawberry**—Medium size, covered with red; fine flavor.....
- Gravenstein**—Large, striped, first quality, good for drying. August and September.....
- Large Sweet Bough**—Large, pale yellow, sweet, tender, and juicy. August.....
- Maiden's Blush**—Medium size, pale yellow, beautiful red cheek. August and September.....
- Red Astracan**—Large, red, juicy, rich, acid; best Summer Apple for cooking. June to July.....
- Red June Carolina**—Medium size, covered with red, tender, juicy. June to July.....

AUTUMN APPLES.

- Alexander**—Very large, streaked red, good for cooking and drying. September.....
- Fall Pippin**—Very large, yellow, tender, and rich. September to October.....
- Gloria Mundi**—Very large, greenish yellow, valuable for cooking and drying. October.....
- Golden Pippin**—Large, yellow, tender, subacid. September.....
- Golden Russet**—Medium size, russety cheek, high flavored. October.....
- Hoover**—Large, covered with deep red, subacid. October.....
- Jonathan**—Medium size, striped, vinous flavor, very productive, valuable for market. November.....
- King of Tompkins Co.**—Very large, red, rich, subacid. October.....
- Rambo**—Medium size, streaked yellow and red, tender, fine flavor. September and October.....
- Rhode Island Greening**—Large, greenish yellow, a well-known old variety; best for cooking. October to December.....
- Roxbury Russet**—Large surface, rough, russet, rich, subacid flavor. October and November.....

Skinner—Originated some twenty years ago at the orchard of Judge Skinner, in San Jose, and is considered, here, one of the best early Fall varieties. Fruit large oblong; skin thin, pale yellow, often with a blush next the sun; flesh very tender, juicy, subacid flavor; tree a vigorous grower. September.....Price.

WINTER APPLES.

Baldwin—Large, bright-red, juicy, rich. An old favorite with some people, but does not keep well here

Esopus Spitzenberg—Large, light red, rich, sprightly vinous flavor, one of the best. November to January.....

Newtown Pippin, Yellow—Large, yellow, firm, crisp, juicy, rich, and high flavored. This is the best California winter Apple, and is more extensively planted than any other variety. December to March.....

Nicajack—Large grayish, finely striped, tender and juicy; the best late red Winter Apple. This Apple is grown largely in the Southern States. January to March.....

Rome Beauty—Large, yellow and bright red. December to February...

Smith's Cider—Large, pale yellow with red stripes, juicy, acid. November to January.....

Swaar—Large, yellow, fine flavor. November to February.....

Vandervere, New York—Large, striped with red, rich and fine. November to January.....

Vandervere, Pennsylvania—Large, waxen yellow, striped red, rich, subacid. November to January.....

White Winter Pearmain—Large, pale yellow, extra high flavor, one of the best. December to February.....

Wine Sap—Medium size, fine red, firm, crisp, high flavor. November to February.....

Yellow Bellflower—Large, yellow, crisp, juicy, sprightly, aromatic; one of the best. November to February.....

Red Siberian Crab—Small, about an inch in diameter, valuable for preserving.....

SUMMER PEARS.

Bartlett—Large, highly perfumed vinous flavor; the best of Summer Pears, valuable for market and canning. August.....

Beurre d' Amalis—Large, buttery, melting, rich. August.....

Clapp's Favorite—A splendid new Pear resembling the Bartlett, ripening a few days earlier; a cross between that variety and Flemish Beauty; tree resemble the latter.....

Beurre Gifford—The first good early Pear. July.....

Bloodgood—Medium size, melting, rich, sugary. July.....

Dearborn's Seedling—Medium size, yellow, melting and delicious. July

Doyenne d'Ete—This is one of the first Pears to ripen, rather small, but melting and sweet.....

Madeleine—Medium size, juicy, melting and sweet; one of the earliest. June to July.....

AUTUMN PEARS.

Price.

- Beurre Clairgeau**—Very large, beautiful yellow and red, nearly melting, high flavored; valuable for market, bears transportation well. October and November.....
- Beurre Diel**—Large, buttery, rich and fine. September.....
- Beurre Hardy**—Large, greenish yellow with light russet, buttery, vinous and highly perfumed. This Pear almost rivals the Bartlett as a shipping Pear for Eastern markets; bears transportation well. August and September.....
- Beurre Superfin**—Large, yellow, juicy, melting, with a high vinous or subacid flavor. A better Pear than Louise Bonne de Jersey, which it much resembles in its acid flavor. September.....
- Duchess d'Angouleme**—Very large, buttery; very juicy, rich fine flavor. September and October.....
- Flemish Beauty**—Large pale yellow with reddish brown cheek, juicy and sweet. September and October.....
- Louise Bonne de Jersey**—Large, yellow, dark-red cheek, very juicy, with a subacid flavor. September.....
- Seckel**—Small, brownish yellow, sweet, rich, spicy flavor. September...
- White Doyenne**—Large, pale-yellow, fine grained, rich, fine flavor.....

WINTER PEARS.

- Beurre Crettonneau**—Large, golden yellow, melting, sugary, vinous. Keeps till April.....
- Beurre Gris d'Hiver**—A large, first-rate, early winter Pear. December to January.....
- Doyenne d'Alencon**—Large, rough, yellow, sugary, very rich flavor. December to January.....
- Easter Beurre**—Large, fine grained, very buttery, rich, sweet flavor. One of the best Winter Pears. December to March.....
- Glou Moreceau**—Large, fine, yellow, fine grained, sugary, rich. November.....
- Vicar of Wakefield**—Large, long, yellow, splendid for baking.....
- Winter Nelis**—Medium size, yellow with gray russet, very juicy and of the highest flavor. Best Winter Pear, and valuable for market. November to January.....

CHERRIES.

Heart and Bigarreau.

- Belle d'Orleans**—Roundish, heart-shaped, light yellow covered with red, juicy and sweet. May to June.....
- Bigarreau Cleveland**—Large, clear red and yellow, sweet and rich; tree fine grower, spreading and productive.....
- Bigarreau Napoleon** (*Royal Ann*)—Very large, yellow, red cheek, one of the best. Late.....
- Black Eagle**—Large, black, rich and high flavored. Late.....
- Black Tartarian**—Very large, black; the best of black Cherries.....
- Coe's Transparent**—Medium size, pale amber, sweet and fine.....
- Elton**—Large, pale yellow, with red cheek, of the finest flavor. Early....
- Gov. Wood**—Large, light yellow shaded with red, juicy and delicious; one of the best.....

Price.

- Great Bigarreau**—Very large, dark-red, almost black, firm and juicy.
Tree a strong grower. Late.....
- Knight's Early Black**—Large, black, sweet, and juicy.....

Duke and Morello Cherries.

- Belle Magnifique**—Large, red, sprightly, subacid flavor. Late.....
- Early Richmond**—An early red acid cherry, good for cooking.....
- May Duke**—Large, dark-red, subacid, rich, ripens a long time in suc-
cession.....
- Reine Hortense**—Large, bright red, slightly subacid and delicious. Late.

PLUMS AND PRUNES.

The planting of this class of Fruit can not be too highly recommended; this year has proven, beyond a doubt, that they can be shipped to the Eastern States, equally as well as Pears—especially those of a firm texture. The presence of the destructive curculio in the East have caused growers to abandon all attempts to raise fine varieties of plums there, confining themselves to but a few of the more common sorts. Experience has demonstrated that California Prunes can be dried and cured equally to those of any country in the world, for which an inexhaustible market is ever at hand, rendering this a business of the most lucrative character.

Price.

- Bavay's Green Gage** (*Late Green Gage*)—Large, round, greenish yellow, sugary, rich, excellent flavor. Late.....
- Bradshaw**—Large, oval, reddish purple, juicy, pleasant flavor, adheres partially to the stone. Early.....
- Coe's Golden Drop**—Large, oval, yellow with red dots, rich, sweet, and delicious. September.....
- Coe's Late Red**—Medium size, round, red, with a rich, vinous flavor; hangs long on the tree. October and November.....
- Columbia**—Very large, round, brownish purple, parts from the stone. Good for drying. August.....
- Damson**—Small, roundish oval, a valuable market variety, much used for preserves. September.....
- Duane's Purple**—Very large, oval, reddish purple, juicy and sweet; tree a good grower. August.....
- Green Gage**—Small, juicy, sweet, with a very fine flavor. Early August.
- Early Golden Drop**—Small, bright yellow, sugary and rich; separates freely from the stone. Early July.....
- Ickworth's Imperatrice**—Above medium size, purple, firm, sweet and rich. A valuable variety for market; bears transportation well, will keep a long time after being gathered. Late.....
- Imperial Gage**—Medium size, oval, greenish, very juicy, sweet and rich; valuable for canning. August.....
- Jefferson**—Large, oval, yellow, reddish cheek, very rich, sweet, and delicious; parts from the stone; valuable for drying and canning. August.....
- Peach Plum**—Very large, roundish, brownish red, pleasant, sprightly flavor; parts from the stone. Early July.....
- Prune, Hungarian** (*Gros Prune d'Agen*)—Very large, bright red, with a thin bloom, juicy and sweet; its productiveness, large size, and bright color make it profitable for market. This variety known under the foregoing names, we have not been able to distinguish from the English Pond's Seedling.....

	Price.
Prune, Fellenberg (<i>Large German Prune, Swiss Prune, Italian Prune.</i>)—Under all these names it has been introduced here. Medium size, oval, dark-blue, very rich and high flavored, parts from the stone. One of the best for drying. September.....	
Prune, Burgundy (<i>Petit Prune d'Agen</i>)—Medium size, egg-shaped, reddish purple, sugary, parts from the stone; an excellent variety for drying; bears immense crops. September.....	
Prune St. Martin's —Medium size, roundish, pale yellow, sweet and rich; parts from the stone. October.....	
Quackenboss —Large, oblong, deep purple, almost black, sweet and sub-acid.....	
Red Egg —Large, oval, light red, fine, sweet flavor; parts from the stone; valuable for drying. August.....	
Royal Hative —Medium size, roundish, purple, with high flavor, the best of early Plums. July.....	
Victoria —Large, oval, light red, juicy and sugary; parts from the stone. August.....	
Washington —Large, round, greenish yellow, very sweet and luscious, separates from the stone. Early August.....	
Yellow Egg —Very large size, rather acid until very ripe, when it becomes sweet. Early August.....	

PEACHES.

Freestones, ripening nearly in the order named.

Hale's Early —A new Peach of medium size, flesh white, juicy, rich, and sweet.....	
Early Tillotson —Medium size, white with red cheek, a splendid early Peach, is liable to mildew in some seasons.....	
Meyer's Early —Large, white with red cheek, rich, melting, one of the best early Peaches; originated in California.....	
Strawberry —Medium size, bright red, dark cheek, rich and delicious flavor.....	
Early York Serrate —Medium size, greenish white, purplish cheek; tree a fair grower and sure bearer.....	
Coolidge's Favorite —Large, white, mottled red, rich, high flavor.....	
Crawford's Early —This very large yellow peach is more extensively grown than any other variety. Tree very vigorous and productive.....	
Grosse Mignonne —Large, white with red cheek, very rich, high, vinous flavor, one of the finest peaches in cultivation; valuable for canning.....	
Morris' White —Large, creamy white, flesh white to the stone; valuable for canning.....	
Late Admirable —Large, pale yellowish green, juicy, melting.....	
Ward's Late Free —Large, white, crimson cheek, a splendid late Peach..	
Crawford's Late —A very large, yellow Peach, with a rich, vinous flavor	
Smock's Late Free —Large, yellow, mottled with red, moderately rich and juicy.....	
Seer's Smock —Large, yellow, and very fine, a seedling from the above, and generally preferred.....	
Crockett's Late White —A new Peach from New Jersey, large greenish white, occasionally some red in the sun, sweet, not very juicy....	
Salway —Large, yellow, with a brownish red cheek, very productive, high color, ripening about ten days later than Smock; it is the most valuable very late Freestone. Lately introduced from England...	

Clingstone.

Price.

- Old Mixon**—Large, yellowish white, red cheek; juicy, with a rich, high flavor.....
- Newington**—Large, white, melting, juicy, and rich.....
- Lemon**—A large beautiful lemon-shaped Peach, with brownish red cheek, with a rich, sprightly, vinous flavor.....

APRICOTS.

- Early Golden**—Medium size, juicy and sweet. Tree a strong grower and good bearer. June to July.....
- Hemskirk**—Large, orange, with red cheek, much like Moorpark, ripens a little earlier.....
- Large Early**—A fine large Apricot, with a sweet, excellent flavor. July..
- Moorpark**—Very large, sweet, juicy, and rich, this is the best variety for market and family use. Late.....
- Beach**—Very large size; much resembles Moorpark.....
- Royal**—Large, yellow, with an orange cheek, firm and juicy, with a rich, vinous flavor. July.....

NECTARINES.

- Boston**—Large, yellow, red cheek, sweet and peculiar flavor. August...
- Hardwicke**—Large pale green, with violet-red cheek; juicy, rich, and high flavor. Early August.....
- New White**—Large, white, very juicy, with a rich, vinous flavor. August.....

QUINCES.

- Apple or Orange**—Large, bright yellow; the best. August and September.....
- Angers**—Large yellow; a strong growing sort and abundant bearer. October and November.....

NUTS.

- Almond, King's Soft Shell**—Originated in San Jose, shell very thin and soft. Tree bears abundantly.....
- Almond, Languedoc**—Large plantations have been made of this variety all over California.....
- Apanish or Italian Chestnut**—Tree quite ornamental, and bears a large fruit.....
- Filberts**.....
- Pecan**.....
- Walnut, English**.....
- Walnut, Black California**.....
- Walnut, Jack American**.....
- Sutter Nut**.....

FIGS.

Price.

- Black Ischia**—Medium size, dark violet or black; very sweet.....
Black California—Large, purplish black, and very productive.....
Brown Turkey—Very large, purplish brown, and of excellent flavor.....
Smyrna—Very large, pale yellow, the best in cultivation in California...
White Marseilles—Medium size, greenish white, sweet and rich.....
White Ischia—Rather small, but one of the hardiest light colored ones;
 often ripens its fruit on two-year old trees.....

ORANGES AND LEMONS.

- Los Angeles Orange**—Large and sweet; tree, hardy and vigorous.....
Sicily Orange—Fruit very sweet; bear when quite young.....
Lemon, Sicily—Oblong, pale yellow, pulp acid.....

MISCELLANEOUS FRUITS.

- Pomegranate**—Sweet-fruited.....
Japan Plum (*Loquat*). This is an ornamental tree, with large, evergreen
 leaves, bearing a fruit like a Medlar; perfectly hardy here.....
Olives.....
Persimmons.....
Medlar.....
Berberry.....
Mulberry, American.....
Mulberry, Downing's.....

GRAPES—Foreign.

- Black Hamburg**—Berries and bunches large. This is the best grape for
 general cultivation; succeeds almost everywhere.....
Black Malvasia—Bunches large and long; good for wine and table use...
California or Mission—The well-known wine grape.....
Flame-colored Tokay—Bunches and berries very large, firm, and sweet;
 valuable for market.....
Golden Chasselas—Berries and bunches large; amber color when ripe;
 valuable for table and wine.....
Riessling—Bunches medium size, compact; berries small, greenish white
 to yellow; a first-class wine grape of high flavor.....
Rose of Peru—Very large bunches, berries roundish, brownish black,
 valuable for market; one of the best.....
Fia Zagos—A large, white grape, in some parts valuable for raisins.....
Sultana (*White Corinth*)—Berries small, seedless, makes splendid raisins.
Muscatel (*White Frontignan*)—Berries set very close, with a rich, musky
 flavor.....
Verdel, White—An Italian grape, bunches very large, berries greenish
 white, with a thick bloom; profitable for market. Succeeds well
 here.....
White Muscat of Alexandria (*Muscat*)—Bunches large, berries large oval,
 pale amber, sweet and rich, fine muscat flavor; a good raisin
 grape; one of the best.....

	Price.
White Sweetwater —The first good early grape.....	
Zinfindal —Bunches large, requires to hang several weeks after coloring, before it is ripe; valuable for wine.....	
Zante —Bunches large, with small berries, of dark purplish color; makes splendid raisins.....	

GRAPES—American.

This class of Grape vines are very strong growers, and well adapted for arbors and trellis. They all have a peculiar musky flavor.

Catawba	
Concord	
Isabella	

CURRANTS.

Black Naples —Berries large and black.....	
Fertile de Palluan —Bunches large; very productive, vigorous growers...	
Cherry —Berries very large, much grown for market.....	
Red Gondouin —Vigorous grower, very productive.....	
White Grape —Bunches and berries large, whitish yellow, sweet and good flavor.....	

GOOSEBERRIES.

Houghton's Seedling —Vigorous grower, and free from mildew; very productive.....	
Whitesmith —An English variety of large size.....	

RASPBERRIES.

Clark —Large, red, a strong grower, and productive.....	
Fastolff —Very large, red, hardy, and productive.....	
Franconia —Fruit very large and red, strong grower.....	
Knevitt's Giant —Large red, excellent; one of the best.....	
Orange —Fruit yellow; first-rate; the best of this color.....	
Prosser —Red; hardy and productive, bears a heavy crop of large berries.	
Red Antwerp —Large, dark red; one of the best.....	
Doolittle's Black Cap —Fruit black, rich, fine flavor; very early.....	
Mammoth Cluster —Large black, strong grower, juicy and rich; valuable.	

STRAWBERRIES.
